## **DETAILED ACTION**

**Claims 1-26 are pending.**

### ***Restriction***

Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

#### **Group I**

Claims 1-15 drawn to a process of preparing a water-soluble sulphur-containing oil and a fungicidal, water-soluble sulphur-containing oil.

#### **Group II**

Claims 16-24 and drawn to a composition and method method of controlling or killing a plant pathogen.

#### **Group III**

Claims 16-21 and 25 drawn to a composition and method of stimulating a plant's uptake of nutrients from the soil .

#### **Group IV**

Claims 16-21 and 26 drawn to a composition and method of adjusting soil pH.

The inventions listed as Groups I- IV do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, they lack the same or corresponding special technical features for the following reasons: the common technical feature in all groups is a fungicidal, water-soluble sulphur-containing oil. This element does not constitute a special technical feature under PCT Rule 13.2 because the element is shown in prior art. US Patent 3,918,983 teaches sulfated mixtures of alcohols and unsaturated oils and use of these mixtures as sulfated castor oil substitutes in textile treatment (abstract). The invention of the instant application lacks a special corresponding technical feature and does not make a contribution to the prior art. Therefore, the claims cannot be said to have unity of invention.

A telephone call was made to Erich Veitenheimur on March 4, 2010 to request an oral election to the above restriction requirement, but did not result in an election being made.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.
